

EMERGING ENTREPRENEURS, INC. PRESENTS:

» THE URBAN LEADERSHIP LAB «

ENTREPRENEURSHIP. MENTORSHIP. ROBOTICS. CODING. COMMUNITY SERVICE.

“Founded by eMerging Entrepreneurs, Inc.; **The Urban Leadership Lab™** is a social incubator that provides our youth with access to the kinds of resources that will advance their capacity to do (and become) their best! Our program brings together non-profits, community & faith leaders, industry executives, university personnel, and volunteers to introduce creative ways of engaging our community's under-served youth. Just as our non-profit organization uses Entrepreneurship as a pathway for community development, our lab aim to surround young people with startup tools, leadership training, and community service opportunities; all in an effort to help our teens unlock the full range of their potential! Not only were we selected to be a part of the White House's "Computer Science for All" campaign as one of its 2016 service organizations, but we've also joined forces with The Emily Krzyzewski Center First Lego League, The LEGO Foundation, Infinite Scholars, and others to offer a productive & safe environment for kids to explore their creativity. Programs include:

1. STEM programs, ranging from LEGO robotics teams to an online Coding Academy;
2. An online & classroom-style entrepreneurship curriculum that introduces young people to the core functions of launching a business or social enterprise;
3. Group achievement, mentorship, and community service programs; and
4. Monthly learning labs, designed to help our young people fully envision themselves in positions of leadership!”
